

ABSTRACT

CareWay

CareWay is a special phone app designed to help people, especially those who need extra care, to stay safe and healthy. The Main purpose of the app is to create that in any uncomfortable situation you can share your details to others instantly. It has many useful features to make sure they are okay, even when things are tough. When someone needs help, CareWay lets them quickly tell their family or friends where they are and what's happening. They can do this by sending a message or making a phone call with just a shake of their phone. This means they can get help fast if something goes wrong. CareWay also helps people remember to take their medicine on time. It sets alarms to remind them when it's time to take their pills. And if they need to order more medicine, they can do it easily through the app. The user can able to write some important notes and also save it as file. And the additional feature of this app is to order the medicine by using various websites available in it. Elders, children, first time mobile users can also use this app easily and conveniently. The best part is, CareWay is easy to use for everyone, even if they're not used to using phones a lot. It's like having a helpful friend always by your side, making sure you're okay and taking care of yourself.
